

When Are You Upgrading

to ISO 9001:2015 & 14001:2015

The latest 2015 versions replace the ISO 9001:2008 version & ISO 14001:2004 version.
It is mandatory to change to the new version.

Why the change?

- Inclusion of broader business context & requirements
- Improved assessment of Needs & Expectations of stakeholders
- Improved Risk & Opportunity management
- More flexible approach
- Increased integration with business needs
- Upgrading to the new version is mandatory

The transition time is 3 years, why now?

- Timely identification of gaps to meet new requirements & thereafter scheduling an implementation plan
- Avoid costs of late transition
- Avoid additional man-days by certification bodies
- Start benefitting the organizational improvements early
- Time it with your recertification / next surveillance audit

KC International

A Finance & Management Services Firm

ESTD. 2004
